

First Project Presentation

Team Members

Date: 10/25/2016

- Motivation/Mission
- Competitors/Similar Applications
- Design Strategy
- Technical Overview
- What's next?
- Feedback...

Motivation (or Mission)

- Pitch your application
- What does it do?
- Who would want to use it?

Competitors (or Similar Applications)

- What are the current alternatives?
- Why is another solution needed?
- How do you differ? (or how are you complementary? Do you fit in an ecosystem?)

- What did you design first?
- What are you implementing first?
- How do you manage the project?
- How do you split the workload amongst group members?

- What is your tech stack?
- What are your Resources?
- What Controllers and Models did you design?
- What Tests have you written or planned?
- Show us what is working so far

What's next?

- What are you working on next?
- What technologies do you still need to learn/integrate into your project?

Demo, if you have one...

Solicit feedback from audience...

Use the audience as a focus group to settle design and technical questions in your design.

Thank You!
